

All the Tamworth Sow lines are being bred in at least 5 herds but when we look at the distribution of lines around the country only one region, North, has all the lines. We would like to try and have all the sow lines in at least three regions over the next few years and we will continue to try and get more distribution of lines to Scotland and South East.

On the sow front, Rita and Roseleaf remain the top priority for breeders. Gilts have been bred and will hopefully be distributed into regions without representation. Lucky Lass numbers are also a cause for concern with numbers falling year on year. We should always ensure that only the best stock is bred and breed standards maintained.

This year, plans are afoot to ensure a number of Glen and Dream Boy boars are distributed around breeders through kinship monitored breeding plans.

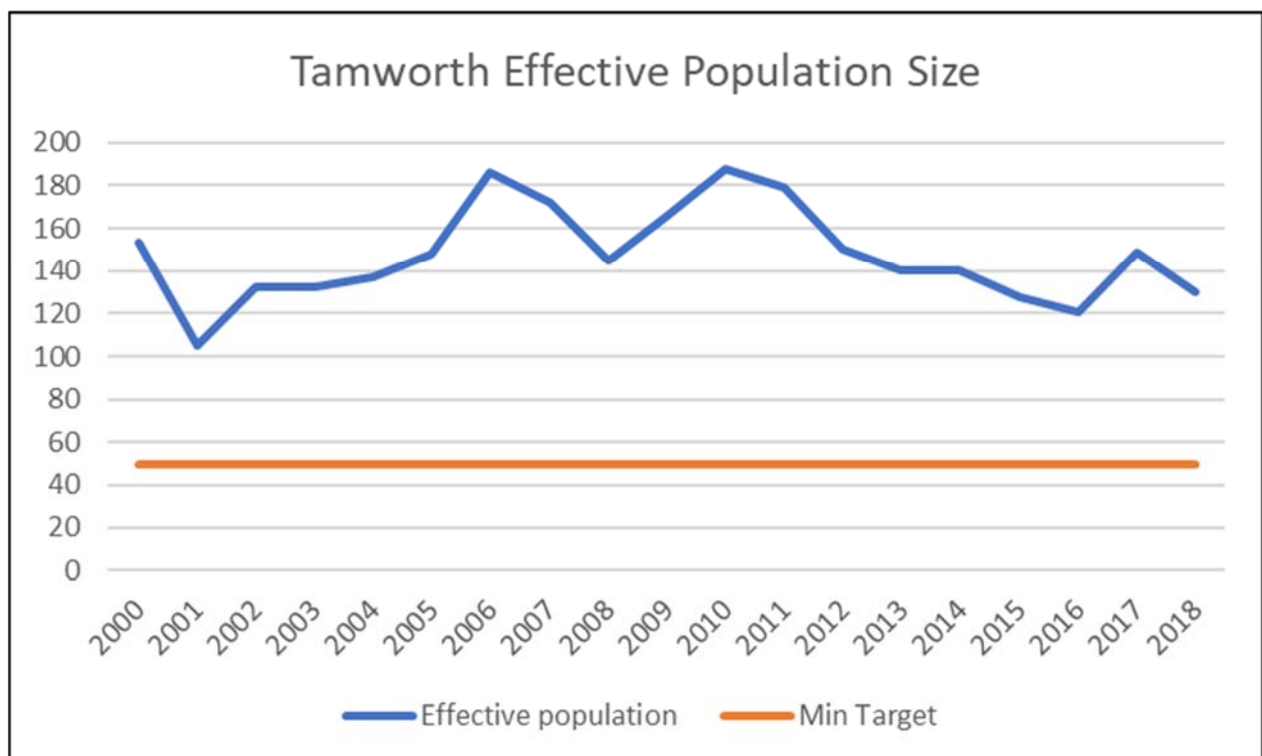

We have a Golden Ranger boar standing at Deerpark that needs to be replaced. With nine boars in the Genebank representing all the lines we are very close to completing our first phase target. We must choose the next boar carefully so that he is as unrelated as possible to the boars in the tank and also unrelated to the live population as a whole.
